LEVEL II

ESOR Courses for EDiR PAEDIATRIC RADIOLOGY

November 11, 2019
Vienna/Austria

Course information

In 2019, ESOR is continuing to organise foundation courses to prepare/assist those entering examinations for the European Diploma in Radiology (EDiR). These courses may also be attended by board-certified radiologists, wishing to update their knowledge in a specific area. A series of courses is organised at the Hotel Das Triest in Vienna/Austria, in November 2019. The format will include nine courses, each one dealing with a specific organ/system-oriented theme.

The teaching concept will include 20-minute lectures, immediately followed by 40-minute case-based reviews on six topics. The teaching/learning objectives for each of the topics will be strictly adhered to the European Training Curriculum. A self-assessment test with multiple-choice questions for each lecture will round-off the exercise.

The ESOR Courses for EDiR are intended to help prospective candidates to prepare for the European Diploma in Radiology examination. Attendance does not guarantee acceptance to take the examination or success in the examination.

Learning objectives

- to acquire knowledge about state-of-the-art imaging of paediatric disorders
- to become familiar with imaging findings of child abuse and the main differential diagnosis
- to understand imaging findings in craniostenosis and the role of MRI

Programme

PAEDIATRIC RADIOLOGY

November 11, 2019
Vienna/Austria

Monday, November 11, 2019

08:15–08:45	Registration
08:45–09:00	Welcome and introduction
09:00–09:20	Imaging of CNS in children from basic to advanced M. Argyropoulou, Ioannina/GR
09:20–10:00	Interactive case discussion M. Argyropoulou, Ioannina/GR
10:00–10:30	Coffee break
10:30–10:50	Imaging in child abuse I. Barber, Barcelona/ES
10:50–11:30	Interactive case discussion I. Barber, Barcelona/ES
11:30–11:50	Imaging the craniostenosis M. Argyropoulou, Ioannina/GR
11:50–12:30	Interactive case discussion M. Argyropoulou, Ioannina/GR
12:30–13:30	Lunch break
13:30–13:50	Imaging skeletal inflammatory and infectious disorders I. Barber, Barcelona/ES
13:50–14:30	Interactive case discussion I. Barber, Barcelona/ES
14:30–14:50	The digestive tract imaging of the most common abnormalities M. Argyropoulou, Ioannina/GR
14:50–15:30	Interactive case discussion M. Argyropoulou, Ioannina/GR
15:30–16:00	Coffee break
16:00–16:20	Imaging the lungs in children I. Barber, Barcelona/ES
16:20–17:00	Interactive case discussion I. Barber, Barcelona/ES
17:00–17:30	Self-Assessment Test

Venue

Hotel Das Triest
Wiedner Hauptstraße 12
1040 Vienna
Austria

Registration fee

ESR members in training
Early fee EUR 200; Late fee EUR 250

ESR members
Early fee EUR 300; Late fee EUR 350

(Early fee until eight weeks prior to the course)
(Late fee after eight weeks prior to the course)

Registration fees are inclusive 10% VAT.

LEVEL II

Learning Objectives

PAEDIATRIC RADIOLOGY

November 11, 2019
Vienna/Austria

Imaging of CNS in children from basic to advanced

M. Argyropoulou, Ioannina/GR

- to become familiar with the role of brain US
- to acquire knowledge about the particularities of brain MRI in children
- to understand the potential of diffusion, perfusion imaging and fMRI in study of the paediatric brain

Imaging in child abuse

I. Barber, Barcelona/ES

- to become familiar with typical imaging findings of child abuse
- to acquire knowledge of the differential diagnosis
- to know how best to use imaging

Imaging the craniostenosis

M. Argyropoulou, Ioannina/GR

- to acquire knowledge about non syndromic and syndromic craniostenosis
- to understand the role of imaging
- to become familiar with associated anomalies

Imaging skeletal inflammatory and infectious disorders

I. Barber, Barcelona/ES

- to get knowledge about the imaging findings of the most common inflammatory and infectious skeletal disorders
- to become familiar with imaging protocols
- to understand when and how to follow-up

The digestive tract imaging of the most common abnormalities

M. Argyropoulou, Ioannina/GR

- to become familiar with the most common disorders of the digestive tract in children
- to know which imaging to use and when
- to acquire knowledge about the differential diagnosis

Imaging the lungs in children

I. Barber, Barcelona/ES

- to get knowledge about the age related mimics of disease in the paediatric thorax
- to become familiar with the imaging findings of the most common diseases
- to know how to use the different imaging modalities

EDUCATION IN PARTNERSHIP
