

BRACCO FELLOWSHIPS EDUCATION IN RESEARCH ENROLMENT FORM

Name of Institution_ **CARDARELLI HOSPITAL_**

City and Country of Institution - Naples Italy

RESEARCH GROUP

Brief description of the research group and of its mission:

Our group is devoted to clinical research in the field of vascular interventional and spine pathology, mostly for aneurism and stroke treatment and vertebral collapse and back pain

TITLE OF PROPOSED RESEARCH PROJECT

- 1) The role of basivertebral nerve ablation in the treatment of low back pain**
- 2) New device for stroke treatment**

OBJECTIVES

- Understand the role of basivertebral nerve ablation in the pathophysiology of low back pain and to verify the potential role of nerve ablation**
- New device are potentially able to obtain a better recanalization rate in patient with distal and proximal vessel occlusion**
- The research will focus understanding different result in patient treated with different device**

APPLICANT'S DUTIES

- It is necessary to be present and to participate to clinical session and research group of study**

APPLICANT'S BENEFITS

- Participation on scientific outcomes of the project i.e. presentations to congresses or publications of papers**
- Project Leader: MARIO MUTO MD**
- Members: Flavio Giordano MD, Giuseppe Leone MD, Massimo Muto MD, Gianluigi Guarnieri MD**
